GSDML File for PDMIE

The GSD(ML) file GSDML-V2.44-ATG-PDMIE-20240527.xml is released for production.

It can be used within the TiA Portal to allow parametrizing the corresponding device (which is in this case the PDMIE) together with a PROFINET PLC. It matches a profile/XSD version up to 2.44.

Support for PROFIenergy V1.2 class 1 is included but no support for F-protocol.

From hardware side it is matching the Anybus CompactCom 40 Modules for PROFINET-IRT and PROFINET IioT Secure. Here is the requirement for the firmware on the Anybus module at least version 2.10 or newer.

This GSD(ML) file can only be used with PDMIE with a Device ID of 0x0008 and the Vendor ID 0x01A1. It cannot be used with PDMI, PDMIS and PDMISE.
