GSDML File for PDMISE

The GSDML File GSDML-V2.44-ATG-PDMISE-20240725.xml is released for production.

It can be used within the TiA Portal to allow parametrizing the corresponding device (which is in this case the PDMISE) together with a PROFINET PLC. It matches a profile/XSD version up to 2.44.

From F-(safety-) protocol side only the extended version 2.6.1 is included. F-protocol version 2.4 is not supported.

Also support for PROFlenergy V1.2 class 1 is included.

From hardware side it is matching the Anybus CompactCom 40 Modules for PROFINET-IRT and PROFINET IioT Secure. Here is the requirement for the firmware on the Anybus module at least version 2.10 or newer. The version on the T100 module needs to be PV1.2.

This GSD(ML) file can only be used with PDMISE with a Device ID of 0x0009 and the Vendor ID 0x01A1. It cannot be used with PDMI, PDMIS and PDMIE.

This GSD(ML) file was used during certification for PROFIsafe, PROFlenergy and PROFINET.

Target Hardware:	PDMISE
Link to GIT/SVN:	http://euqitlab.atg.root/mpro/components/gsdml/-/tree/Release_of_PDMISE_GSDML

For request to:					
AE	X	- for consideration at new disposition	SE	X	- for consideration at service benefits
		- first consume old stock	SL		- information to all external agent representatives
		- rework stock	EN		- creating material data in SAP
	X	- for consideration at operation	PD		- ordering
X	- information to all mechanics			- current orders	
RDS /	X	- for consideration at new conception			- debut price
ENS /	X	- for consideration at software duplication	RDL		- update test beds
ENH		- update test beds
